

VERSA-DOME® DIAPHRAGMS

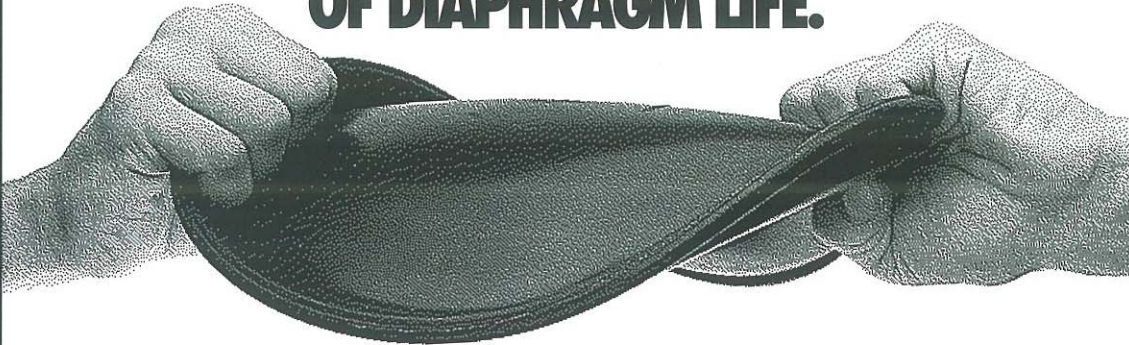

Diaphragms, Diaphragm Plates and Conversion Kits

• PAINTS AND SOLVENTS • PIGMENTS • RESINS • CONSTRUCTION WATER AND WASTE • FOODS •

CERAMIC SLIPS, SLURRIES AND GLAZES • INKS AND PRINTING LIQUORS • LOW-DENSITY POWDERS

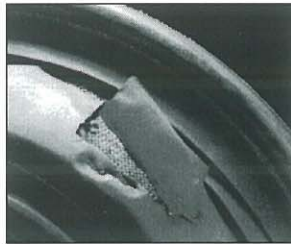

BEER AND WINE • MINE TAILINGS • CHEMICALS • OILS AND LUBRICANTS • GLUES AND ADHESIVES • DYES

OUR NEW VERSA-DOME® PUMP DIAPHRAGMS TAKE THE STRESS OUT OF DIAPHRAGM LIFE.

Keeping it simple is the key to the longer life of the new VERSA-DOME® diaphragm from Versa-Matic.

By utilizing computer-aided design engineering, the simple, smooth shape of this unique dome diaphragm eliminates the complex angles that cause internal stress and limited flexibility. In fact, these diaphragms are so flexible they can be installed and removed *without* the use of pry bars.

The complex angles that can cause diaphragm wear have been designed out of the new VERSA-DOME® diaphragm.

Currently available for our 2" and 3" pump models, these diaphragms can also be used as replacement parts for Wilden's M8 and M15 pump models. At Versa-Matic Pump we're committed to constantly improving on our already proven products. And this new line of pump diaphragms is just one more innovative first that the industry has come to expect from us.

So ask for the diaphragm that provides longer-life diaphragm operation for stress-free maintenance – ask for the VERSA-DOME® from Versa-Matic Pump.

Versa-Dome® and Versa-Matic® are registered trademarks of Versa-Matic Tool, Inc.
